

DIGITAL TIMBER

FORESTRY SUMMER STUDENT POSITIONS

Digital Timber is looking to hire a highly motivated individual to assist us with our forestry data collection operations using remotely piloted aircraft systems (RPAS) in North Bay, ON. This position will run from early April 2021 through August 2021. Successful candidates will be responsible for assisting our company operations in the areas of RPAS data collection and data processing. Digital Timber offers compensation packages that are appropriate with the capabilities and experience of the successful candidate. Wage ranges is \$16/hr to \$18/hr.

Primary Job Duties:

- Drone operations, including flight and safety planning, and imagery / data analysis
- Creating Orthomosaic maps and 3D models from drone imagery and extracting data in GIS software
- Data processing and software calibration
- Assessments / reporting for forest management and GIS mapping

Qualifications

We are accepting applications from students currently enrolled in a forestry or resource management program. Graduating students will be considered, with the potential for continued employment following the summer season.

Additional qualifications include:

- Strong commitment to safety
- Effective communication and team working skills
- Physical ability to work in rugged terrain including ATV and 4x4 Pickup operation
- Valid Class 5 drivers' license
- High degree of comfort travelling to and working in remote forested areas
- Previous forestry experience is a significant asset

Application Information

Please submit a cover letter and resume to ericr@digitaltimber.ca no later than April 7st, 2021. Thank you to all applicants but only those selected for an interview will be contacted.
